

JASON WINDOWS

AWNING WINDOWS

SETTING THE STANDARD

AWNING WINDOWS

CLASSIC AWNING WINDOWS IN A RANGE OF BEAUTIFUL FINISHES

Awning Windows are hinged at the top and open from the bottom to let in the fresh air while keeping out the elements. They operate and adjust smoothly to provide controlled ventilation. When closed, positive weather-stripping creates an airtight seal. An advantage of the awning is that they can be left partly open for ventilation during inclement weather.

ELEGANCE JASON PRODUCT FEATURES

Dual weatherseal design

Building-in Ties

Chain operated keylock winder

TEN YEAR WARRANTY

SIZES

There is an extensive range of styles and combinations incorporated in the Jason Awning Window series, with a configuration to suit your requirements.

STRENGTH

Sturdy frame design maintains minimum frame width of 75mm. Compatible with all Jason Windows products.

PLASTER STOPS

Jason's unique Plaster Stop minimises cracking and reduces the cost of maintenance.

FLYSCREEN

A fully integrated full-length interior flyscreen, which is protected from damage in strong winds and improves the outside appearance of the window. The flyscreen frame is made from extruded section for added strength and durability.

EXTERNAL FRAME MOULDING

A clip-on mould provides a perfect window to cladding alignment for frame/clad construction. Specifically designed to compliment Cedar, PVC and Hardie Plank external cladding systems.

KEYLOCK

Chain operated keylock winder which can be locked in an open position and operates without the need to open the flyscreen.

COLONIAL BARS

Choose either a chamfered or flat profile Colonial Bar that is precisely cut to provide the effect you are looking for.

CONTINUOUS HINGE

Integrated into the top of the sash enables the window to shut with a close fitting weatherproof seal all around the sash to keep out draughts, dust and rain.

COLOURS

Thinking of colour? Jason offers a large range of decorator colours that can be co-ordinated with windows and doors for a total 'look'. They are available in gloss or matt, using the latest powder coat finish oven cured, to give lasting beauty and durability. The final effect can be enhanced with the use of toned glass - the choice is yours.

STANDARDS & COMPLIANCE

Products are designed to meet the performance criterion as stipulated in AS 2047 and tested by NATA approved agencies. As a member of the Australian Window Association products are subject to third party audits designed to ensure that the product matches the publicised test results. Performance labels are permanently placed on all windows to confirm the structural rating and the water performance capabilities.

QUALITY

Certified to ISO9001. Independently audited bi-yearly to ensure compliance.
