SECURITY, STRENGTH & ELEGANCE THE DURABILITY OF ALUMINIUM

For aesthetics, performance and affordability, Jason horizontal sliding windows are the number one choice with homeowners. They offer the advantage of wide opening to maximise ventilation, with no sash projecting in or out beyond the window pane. Advanced security features include the famous KeyLock and BreezeLock for your peace of mind. Another open and shut case for Jason!

JASON PRODUCT FEATURES

SECURITY

Jason's unique joinery design conceals all fixings for top security and aesthetic appeal.

- One key locks all windows
- Available with BreezeLock, designed to automatically lock in your choice of 3 set positions: 100mm, 50mm or closed.
- Tested by Curtin University (Reference Test Number: 3159) to withstand 314kgs of direct pressure without failure in the fully closed position.

STRENGTH

Sturdy frame design maintains minimum frame width of 75mm. Designed specifically for cavity brick construction.

RANGE

There is an extensive range of styles and combinations incorporated in the Jason Sliding Window system. Single sliders, double sliders, centre sliders, bay windows, sliders with silicon jointed fixed lites all in a vast range of sizes, guarantee an ideal solution for your design requirements.

STANDARDS & COMPLIANCE

Products are designed to meet the performance criterion as stipulated in AS 2047 and tested by NATA approved agencies. As a member of the Australian Window Association products are subject to third party audits designed to ensure that the product matches the publicised test results. Performance labels are permanently placed on all windows to confirm the structural rating and the water performance capabilities.

PLASTER STOP

Jason's unique Plaster Stop minimises cracking and reduces the cost of maintenance.

GLAZING

Glazed externally incorporating high tack pressure tape adhering the glass to the frame on contact.

The best in water proofing performance without compromising security.

AIR CON RATING

The dual seal design minimises air leakage and produces an air conditioning rating, ensuring you get maximum efficiency from heating and cooling appliances.

EXTERNAL FRAME MOULDING

A clip-on mould provides a perfect window to cladding alignment for frame/clad construction. Specifically designed to compliment Cedar, PVC and Hardie Plank external cladding systems.

COLONIAL BAR

Chamfered and flat profiles that are precisely cut or bent to form a pattern of your choice to enhance the appearance and style of your new home.

QUALITY

Certified to ISO9001. Audited bi-yearly to ensure compliance.
